

Chill Lounge

Tools Required

Lounge chair ships fully assembled

- Safety glasses
- Phillips head screwdriver for tightening or removing anchor plates
- Non-corrosive anchoring hardware, up to 3/8" dia thread size, if the unit is to be surface mounted. Length determined by site conditions. Quantity of 2 per chair required.

PROCEDURE:

For a freestanding unit:

1. It is recommended to remove the installed anchor plates to prevent marring the flooring surface. Set unit in place.

For a surface mounted unit:

1. Check the screws that fasten the mounting plates to the lounge. Tighten if necessary.
2. Set the unit in the desired position and mark the anchor hole locations.
3. Move the unit and drill the holes.
4. Install anchors according to manufacturer's instructions.
5. Move lounge back in place and fasten.
