lakeside™

Lakeside benches and accessories are part of the Landmark Collection of outdoor furniture created by distinguished architects and designers and inspired by familiar themes in nature, architecture and historic design. Lakeside is contemporary in form and materials, traditional and pastoral in motifs. The universal formed steel frame, which recalls the platform swing of another time, is sturdy and strong, and offers a comfortable flat surface for resting the arms. In the first of two bench styles, low-tech pickets are rendered in high-tech Polysite to form the slat seat and back. Wood pickets are offered as an option. McCurry's inspiration was a staggered picket fence discovered around a Victorian era cottage. In the Lakeside bench, as in her architecture, the linkage is artfully transformed so, as she puts it, "the history and memory are there, but they're joggled a bit."

Porch swings, picket fences, marsh grasses and falling leaves all make their marks on Lakeside benches and accessories designed by award winning architect Margaret McCurry for Landscape Forms.

Trees and grasses provided McCurry's inspiration for the second bench style, which expresses these motifs from nature in perforated metal seats and backs. In these benches, sheet steel provides the foil for enchanting reflections of the outdoor environments in which Lakeside furniture is placed. Decorative patterns are made by state-of-the-art plasma-cutting technology. In one version, grass spouts on the horizontal seat plane and grows to long, graceful fronds on the vertical back. In another, leaves scatter and fall from back to seat. Backless benches repeat the patterns on their seats. McCurry's design for a complimentary litter receptacle is a trim cylinder with a recessed base, offered patterned or plain. The Landscape Forms color palette provides fresh, out of the ordinary hues in powdercoat finishes.

Grass and leaf patterns in Lakeside litter receptacles compliment Lakeside benches.

### Custom patterns can be created to suit the setting

The plasma-cutting technology used to incise leaves and grasses into standard Lakeside products enables designers to create their own vocabulary of patterns, lines and logos for the products on their projects. The process is simple. Design professionals provide electronic CAD drawings of decorative or brand motifs, which are programmed into Landscape Forms' technology driven tool. Designs are precision cut into the seats and backs of benches and the metal walls of receptacles. The process offers unique opportunities for customizing outdoor furniture for individual applications.

## Our Purpose Is To Enrich Outdoor Spaces

We believe in the power of design and its ability to elevate experience and help create a sense of place in public environments. Our high quality products and outstanding customer service have earned us a reputation as one of the world's premier designers and manufacturers of outdoor commercial furnishings.

## Lakeside Specifications

### Benches

Benches are made with dual 1/4" thick steel frames, welded and bolted together with stainless steel hardware. Benches are 67" in length and available backed or backless. End arms standard on backed benches.

Picket fence panels may be specified in Polysite™ or wood. All picket fence boards are attached to the steel bench frame with stainless steel hardware.

Metal seats and seat backs are available in grass, leaf or custom designs which are plasma-cut steel panels, bolted to the bench frame with stainless steel hardware. Bench comes standard with freestanding/surface mount support.

Metal panels may be designed with a custom pattern for a minimal up-charge. Ask your Landscape Forms representative for details.

### Finishes

*Exterior* woods are unfinished and will weather to a soft pewter gray, requiring no future maintenance.

*Metal* is finished with Landscape Forms' proprietary Pangard II® polyester powercoat, a hard yet flexible finish that resists rusting, chipping, peeling and fading. Call for standard color chart. A wide array of optional colors may be specified for an upcharge.

Visit [landscapeforms.com](http://landscapeforms.com); click Design Tools, Materials/Colors link for standard offerings, including FSC wood options.

Metal is the world's most recycled material and is fully recyclable. Powdercoat finish on metal parts contains no heavy metals, is HAPS-free and has extremely low VOCs. Consult our website for recycled content for this product.

Landscape Forms is proud to specify FSC and Green-e certified paper. This paper meets the Forest Stewardship Council's standards for responsible forest management and is made using certified renewable energy.

### Litter Receptacles

Lakeside litter receptacles are available in side, or top-opening designs. Side-opening litter receptacle has a 30 gallon capacity, top-opening has a 35 gallon capacity. Steel panels are available in grass, leaf, custom or plain designs which are plasma-cut steel. Litters come standard with a removable black polyethylene liner. Receptacles are standard with freestanding/surface mount support.
