

A woman with dark hair, wearing a grey V-neck sweater and blue jeans, is sitting on a black metal slatted bench. She is smiling and looking towards the camera. The bench is outdoors, next to a pond. In the background, there is a stone bridge with an arch over the water. The scene is set in a park-like area with trees and a stone wall.

landscapeforms®

village green™

Village Green is a refined update on a simple American classic and a new addition to Landscape Forms' Landmark Collection.

Designer John Rizzi has re-imagined the schoolyard bench of his boyhood as an impeccably detailed seating solution for today's small urban spaces. Village Green is light in scale and heavy on comfort. Its posture angle, depth of seat, and generous front radius provide support for back and legs and an impressively comfortable seating experience.

Village Green is smooth around the edges. Seat and back straps are connected to the frame with sealed welds, creating a polished visual and tactile detail. The bench frame and straps are made of bar steel in two weights, with steel rods as back supports. Construction is carefully balanced so Village Green is as light as it can be to make sustainable use of materials and heavy enough to support urban public use.

Our Purpose Is To Enrich Outdoor Spaces

We believe in the power of design and its ability to influence and elevate the quality of public space. High quality products and outstanding customer experience makes us one of the world's premier designers and manufacturers of outdoor commercial furnishings.

Village Green™ Specifications

Benches

Backed horizontal strap seat style is standard on the 70" bench. Optional end arms and center arm are welded to the frame.

Supports are made of 3/8" x 1-1/4" steel bar. Seating surface is made of horizontal steel straps reinforced with a back brace and 7/16" diameter profile rods. Village Green bench ships fully assembled, with freestanding glides and can be surface mounted.

Village Green meets BIFMA performance and safety standards.
