

A row of black metal park benches is shown in a park setting. The benches are made of dark metal with slatted backs and curved armrests. They are positioned on a grassy area. In the background, there are several tall buildings, including a prominent skyscraper with a glass facade, and some trees with bare branches and some with green leaves. The sky is clear and blue.

landscapeforms®

presidio™

So strong it stands up to the heaviest use
...so durable it withstands weather and
wear...so beautiful it makes it all look easy.

Presidio complements the urban streetscape, the college campus and the public park by letting the setting shine through.

The Presidio Collection of seating and receptacles was designed by Brian Kane to meet the rigorous demands of unsecured public spaces while keeping the focus on the surrounding environment. Presidio is visually strong and also transparent. It is tough, fail-safe, graffiti-resistant and also remarkably refined. It is manufactured of rugged steel tubing and rods but bears the unmistakable mark of craft. It is simple in its vocabulary of elements, diversified in its possibilities, elegant in its form and presence.

Landscape Forms your environment

Since John Chipman, Sr. founded Landscape Forms in 1969, we have been guided by a few simple values. We believe in the power of design and its ability to influence and elevate the quality of public space. We make high quality products that last. And we deliver an outstanding customer experience. Those beliefs, along with our expertise in the development of public space, make us one of the world's premier designers and manufacturers of outdoor commercial furnishings.

Presidio Specifications

Distinctive

The Presidio™ Collection, designed by Brian Kane, combines graceful contours with durable materials to provide an elegant, yet secure solution for unprotected public spaces. The collection includes seating, litter receptacles and an ash urn.

Durable

Presidio seats and receptacles feature solid metal rods, welded to tubular steel frames. Arms are tubular steel, welded to the seat frame. Seats bolt securely to a horizontal tubular steel support, which may be freestanding, surface mounted or embedded.

Finishing

All metal is finished with Landscape Forms' exclusive Pangard II® polyester powdercoat process which forms a surface that resists rusting, chipping, peeling and fading.

To Specify

The Presidio Collection offers a wide range of design versatility. Refer to the Presidio Collection Specification Guide for complete information.

Seats

Presidio seating is offered with or without backs. Arms may be specified for either style. One arm – left or right side – or two arms may be specified per seat. Left or right arm is determined from the position of sitting in the seat. A special end unit combines with backed seats for a dramatic effect.

Presidio seating may be specified in straight runs or standard curved configurations of 60° radius or 118° radius (to center of support). For special applications, custom radius curves are available.

Supports may be specified freestanding, surface mounted or embedded.

Receptacles

Presidio litter receptacles are offered in side- or top-opening styles. These durable units feature a hinged door and rigid polyethylene liner with a 30-gallon capacity. Freestanding/surface mount tabs are standard. An ash urn may be specified for either style. Ash urn hooks over top rod on door side and is held in place when door is closed. A keyed door lock may be specified for additional security.

Presidio is designed by Brian Kane, IDSA.
