Larkspur: Planters with presence for significant settings

Subtle in shape and commanding in size, these beautifully proportioned cast concrete planters by designer Larry Kornegay are, like their namesake flower, products of nature and no two are exactly alike. Cast concrete lends compelling individuality in surface qualities that give each Larkspur planter its own variations and visual interest. The strength and durability of the material ensures performance in all climates while weather and age impart a patina that attests to its timelessness.

Sense of Place

We believe in the power of design and its ability to elevate public spaces. Landscape Forms provides great design, integrated product collections, and leading edge technology for creating a sense of place in outdoor environments.

Larkspur Specifications

Larkspur planters are available in three sizes. Constructed of cast concrete, pricing includes the planter in a variety of standard colors.

The 24" planter is a 36" square planter with rounded corners. The planter is 24" tall and holds approximately 7 cubic feet (52 gallons) of planting material.

The 30" planter is a 48" square planter with rounded corners. The planter is 30 inches tall and holds approximately 17 cubic feet (127 gallons) of planting material.

The 48" planter is a 32" square planter with rounded corners. The planter is 48 inches tall and holds approximately 10 cubic feet (75 gallons) of planting material.

Material

Concrete is the traditional mixture of sand, rocks (aggregate), water and the binding materials cement and fly ash. When appropriate, additives are included that enhance the concrete's durability in cold weather conditions. The strength of the concrete is tested regularly, and measures between 5000-6000psi.

To Specify

To order: Specify Larkspur planter size and standard color. Planters are freestanding and ship with a standard 2" drain hole. Visit landscapeforms.com for standard color options.
