select

Select: distinction in the line of duty.

Select the recycling system that's best in class. This modular system of steel recycling units by industrial designer Brian Kane provides a choice solution for upscale settings with multiple choices of its own. Engineered and built for outdoor use, the well-proportioned Select elements are entirely at ease indoors as well. Heavy steel construction and 25-gallon capacity make them stronger, more resilient and more capacious than the competition. Hidden hinges and handles, flanged doors, and cast aluminum trim rings lend an unusually refined appearance. Select one, two or three units in plain or perforated steel, mix and match a wide range of powdercoat colors, and pick from an array of plates to label content configurations of your choice.

Our Purpose Is To Enrich Outdoor Spaces

We believe in the power of design and its ability to elevate experience and help create a sense of place in public environments. Our high quality products and outstanding customer service have earned us a reputation as one of the world's premier designers and manufacturers of outdoor commercial furnishings.

Select Specifications

Select units are fabricated with sheet steel bodies and cast iron bases. Units may be specified as single, double or triple. Receptacle top is solid to keep contents dry. Body and doors may be specified as all solid, all perforated or a combination of solid and perforated. Multi-use, slot or 5" diameter opening available on all units. Select can be ordered with custom signage and optional locks.

Trim rings and signage plates are cast aluminum and may be powdercoated any Landscape Forms standard color.

Adjustable glides and a black polyethylene liner ships with each unit. Select ships fully assembled.

17" x 17" x 42"

17" x 34" x 42"

17" x 51" x 42"

d x w x h

The strong roto-molded polyethylene 25-gallon liner has a chunky lip that supports the liner handle and prevents tearing.

A durable custom engineered stainless steel hinge supports the flanged steel door and swings it outward in a wide arc. Tested for years of opening/closing as well as downward pressure when opened.

An optional cam lock is positioned at the top front of the unit between the badge and the rim of the opening.

Leveling glides are readily accessible and adjustable with a screwdriver; no need to lift or reach under the unit.

Finishes

Metal is finished with Landscape Forms' proprietary Pangard II® polyester powercoat, a hard yet flexible finish that resists rusting, chipping, peering and fading. Call for standard color chart. A wide array of optional colors may be specified for an upcharge.

To Specify

Specify Select recycling system, choose single, double or triple unit. Specify body and doors as all solid, all perforated or combination of solid and perforated. When specifying combination, provide solid or perforated choice for the body and for each door. Specify opening style(s): multi-use, newspaper slot or 5" diameter.

Specify powdercoat color(s) for body, door, opening trim and signage plate. Specify standard or custom signage wording and with or without lock for each door.

Visit "Select Recycling System" on landscapeforms.com for standard signage wording choices.
