PLACE:
HEALING GARDEN

A serene area in which design and natural elements engage the senses through color, touch, sight, and sound.

PRIMARY INSIGHT:
NURTURE HEALING

Connect patients, staff, and visitors with natural light and fresh air to nurture healing, provide moments of respite, and establish a healthy mind-body balance.
ELEMENTS, ATTRIBUTES, AND USER EXPERIENCE

Perimeter gardens offer an outward-facing view to people desiring a peaceful, secluded experience.

An abundance of Upfit green panels bring tranquility and soft surfaces to this Upfit structure.

Upfit open and louvered roofs give people options for shade or unobstructed views to the sky. Louvered roofs provide protection from wind and sun; weather management offers control of sun and shade levels and rain protection.

Water features introduce a calming focal point.

Power for the overhead fans is delivered through Upfit’s posts and beams. Powered Upfit spaces can also accommodate overhead and embedded lighting and access points to charge devices.

Generous circulation aids people using wheelchairs or walkers.

An open, centrally located seating area for visiting and sharing a meal features Chipman tables and 21 chairs.

Abril benches ground the meditation spaces and invite people to enjoy the sounds of the water features.

FGP benches with arms provides an alternative to sitting at tables.

FGP path lights provide wayfinding and illuminate the walking path.

Kornegay Ribbed planters bring plants and flowers into the central seating area.
