PLACE:
WATERFRONT DECK

A waterfront deck connects the indoors to the outdoors and provides space for communing with the water and socializing.

PRIMARY INSIGHT:
ENHANCE IDENTITY AND LIFESTYLE

Nature-rich and immersive outdoor experiences that offer inspiration and enjoyment can enhance well-being.
**Elements, Attributes, and User Experience**

Engaging in social activities while in proximity to water brings energy and enrichment to the human experience and stimulates the senses.

The **Upfit** structure creates both a centralized gathering space and zones delineated for lounging, dining, and small gatherings.

Upfit’s sleek, contemporary post-and-beam design and slatted panel back wall elevate the outdoor experience and the cache of a luxury waterfront deck.

Upfit slatted panels provide protection from wind and a sophisticated backdrop that defines boundary.

Power running through the Upfit posts and beams allow an overhead fan to cool and circulate air in the central gathering space and can accommodate overhead lighting, monitors, and charging access at Upfit in-line and peninsula tables.

**TUUCI Parasols** offer shade in the lounge and dining zones.

ELEMENTS, ATTRIBUTES,
AND USER EXPERIENCE

G Harvest dining-height tables and benches gather individuals and groups for communal activity around its generous surface. An integrated LED light option extends Harvest’s use into the evening.

H Cochran tables and lounge chairs create conversation groupings on the cantilevered deck.

I Cochran chaise lounges offer people places to relax physically and mentally with a view to the water.

J Sorella planters define boundaries between the lounging and dining zones and the deck perimeter and provide a habitat for colorful flowers and plants.

K FGP path lights illuminate the deck’s perimeter and promote safe use of the deck during the evening.
