21

21.

Created in collaboration with Modello USA, the 21 line imbues outdoor space with a fresh, easygoing yet effortlessly stylish energy. With clean lines and an intuitive approach to comfort, 21 Chairs and Lounge Chairs invite you to sit in whatever way just feels right. Designed to blend seamlessly into high-design environments while maintaining an approachable attitude, 21 is simplicity, versatility and comfort in perfect balance.

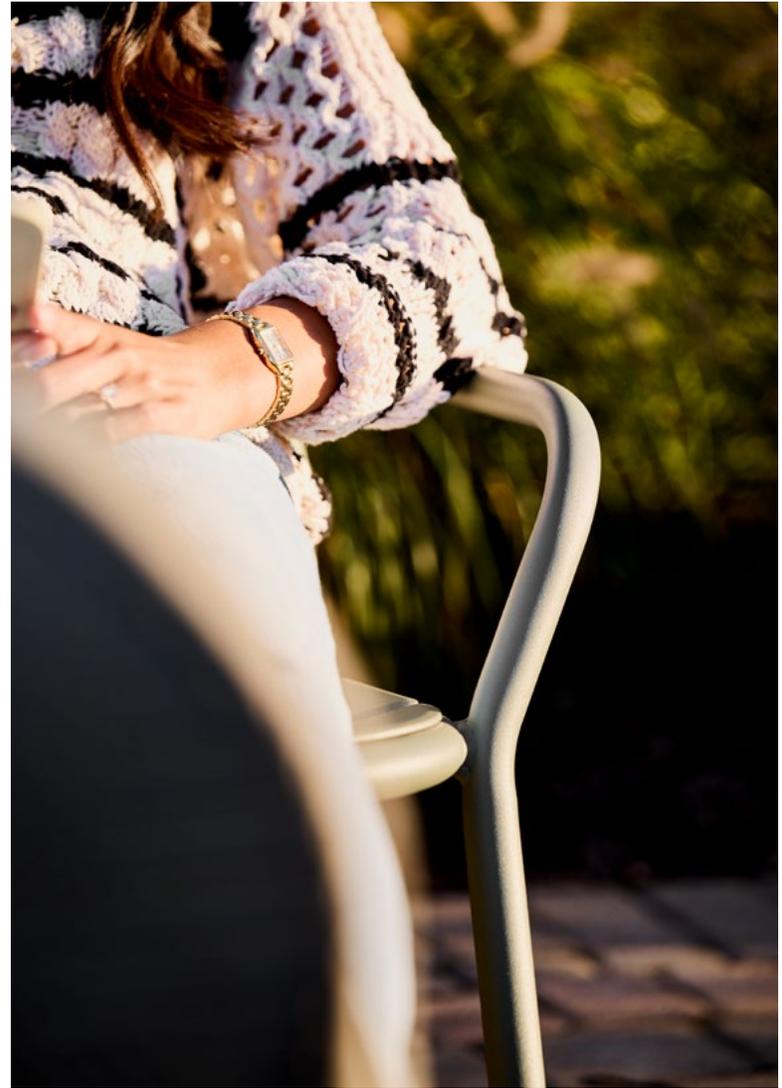

Keep It Casual

The 21 Chair's simple form and honest approach to materials and construction lend a casual personality to outdoor spaces. Designed for anywhere and anyone, the steel tube frame, the subtle curve and chamfered edges of the die-cast aluminum slatted seat and back, and a roomy, 21"-wide seat create comfortable surfaces that invite multiple postures. Sit sideways, lean back, take it easy.

Keep It Relaxed

Even more relaxed, the 21 Lounge Chair is crafted with the same elevated simplicity, honest materiality, and dedication to comfort across multiple postures. It leans even further into leisure with the same wider-than-standard seat pan canted back slightly and positioned lower to the ground for a comfortably laid-back seating experience. Effortlessly blending casual charm with modern sophistication, the 21 Lounge Chair is ideal for high-design outdoor social spaces. Kick back, lean in, unwind in style together.

Keep It Simple

21 Chairs and Lounge Chairs seem at home indoors, but they're designed and crafted for outdoor spaces and outdoor elements. The 21 Chair is offered with arms angled for natural support or without arms, and both the Chair and Lounge Chair can be stacked up to four high. 21 Chairs and Lounge Chairs are finished in a single color, but the frame and slats can be ordered in different colors upon request. Both are finished with our proprietary Pangard II® HAPS, VOC, and lead-free polyester powdercoat that resists chipping, peeling, and fading.

Materials

Vivid Series - Powdercoated Metal (Fine Texture)

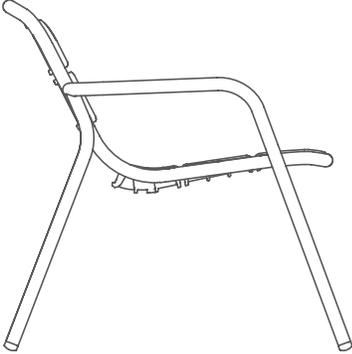

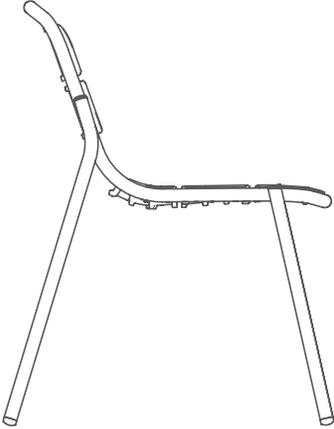

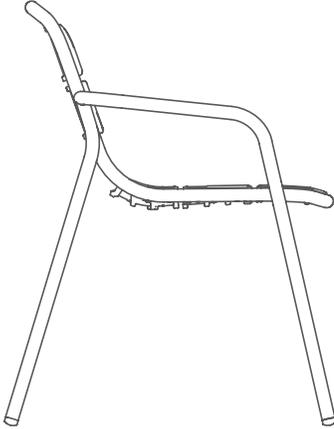

Neutral Series - Powdercoated Metal

Architectural Series - Powdercoated Metal* (Fine Texture)
