Scenic Ideas and Inspirations

Scenic is the innovative adaptive structure system with versatile, modern design and endless flexibility. From college and corporate campuses, to luxury hospitality settings, to rooftop amenity spaces, to high-traffic public outdoor areas, Scenic transforms a wide range of outdoor spaces into tailored destinations that enhance the way people connect with nature. The structures scale up and down to address a project's unique design goals, functional requirements and site-specific considerations. Freestanding or façade-mounted, Scenic can range from a simple single pergola to an expansive multi-unit structure, fully customized with infill panels, lighting and accessories.

This Planning Guide offers ideas and inspiration on how Scenic can be applied in these diverse contexts, illustrating how its structural modularity, dynamic functionality and varied accessories can bring new value to existing and underutilized outdoor spaces. As Scenic is designed and engineered to spark the creativity of landscape architects, architects and designers, and empower them to craft unique, site-specific installations, the following examples represent only a small fraction of the potential solutions this adaptable structure system offers.
