Trapeccio

Seating in Rare Form

Named for the two trapezoidal forms that compose the back and seat of the bench, Trapecio offers new possibilities for outdoor leisure. Wherever it resides, Trapecio stands out for the beauty of its robust yet elegant geometry.

A Unique Invitation to Connecting Outdoors

A large-scale site furnishing designed to comfortably accommodate seating or leaning on both the seat and the back, Trapecio is at home in parks and along avenues, as well as in corporate, educational, and healthcare campus settings. Surface-mounted, galvanized steel supports coupled with architectural concrete or fine-textured Alaskan Yellow Cedar back and seat make Trapecio ideally suited for a long, durable life outdoors.

An Exercise in Tension and Balance

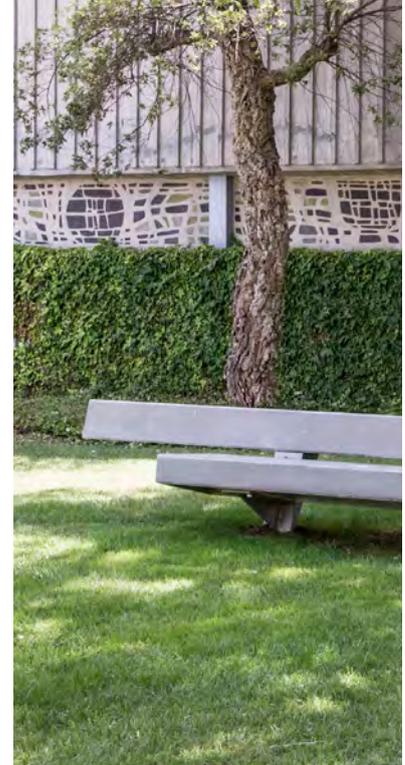

Substantial yet seemingly weightless, suspended yet solidly anchored. Trapecio demonstrates the striking, affective design made possible through modern, high-performance materials and expert manufacturing. The two offset forms create a bold cantilever effect that invites the eye and inspires closer inspection. The design is at once innovative yet understated, sturdy yet delicate, stark yet inviting, geometric yet ergonomic.

SANTA & COLE urbidermis

10%   Printed on 10% post-consumer recycled paper using plant-derived ink from sustainable crop sources
